

OSA Middle School Math Pathways

Grade Level Sequence

The Accelerated Pathway distributes the acceleration over grades 6 & 7. This plan offers the most flexibility and ease for students to opt in or out of acceleration with respect to the content and cognitive demand of these courses. If the pace is too demanding in the 6th grade, students can resume a regular 7th grade course with a head start. Students complete Core Connections, Course 1 and half of Core Connections, Course 2 in 6th grade, then complete Core Connections, Course 2 and all of Core Connections, Course 3 in 7th grade. They take Core Connections Algebra or Core Connections Integrated I in 8th grade. This pathway also allows for students to begin acceleration in 7th grade. If students opt in at 7th grade, it will be easier for them to catch up on the content from the first part of Core Connections, Course 2.

Accelerated Pathway 6th Grade

Accelerated Pathway 7th Grade
